INFORMATION SHEET

November 2016

Whitechapel Station closure on 19 and 20 November 2016

London Underground services will be suspended and London Overground trains will not be stopping at Whitechapel station from Saturday 19 November until Sunday 20 November. Please refer to www.tfl.gov.uk for details of alternative services. During this time Crossrail will carry out upgrade activities which, for safety reasons, must take place when the railway is not operational.

Further details can be found on the map on the next page. Please note that while these are the primary areas of work, other supporting activity will be carried out throughout the suspension of services at the station. This is in addition to the normal ongoing programme of works around the station.

To help us complete our works, Court Street Bridge and the pedestrian area in front of the temporary ticket hall may close as required between the early hours of Saturday 19 November and Monday 21 November. The section of Court Street between Whitechapel Road and the steps onto the bridge will remain open as usual during the works. Access to properties along Durward Street including the Sports Centre will be maintained at all times from the west. Vehicles using Durward Street might be asked to wait a few moments if site deliveries are taking place during this time.

These works are in addition to our normal ongoing programme of night time activity which takes place in the vicinity of Whitechapel station. General site activity is carried out between 08:00 and 18:00 daily. Lower impact activity is carried out between 18:00 and 00:30 with activity alongside the railway taking place between 00:30 and 05:30. The site area within Kempton Court will be used for cranes intermittently on an ongoing basis.

Duration of work

- A special programme of activity while services at the station are suspended between the early hours of Saturday 19 November until 05:30 on Monday 21 November 2016
- Preparatory activity will take place in the weeks prior to the closure

What to expect

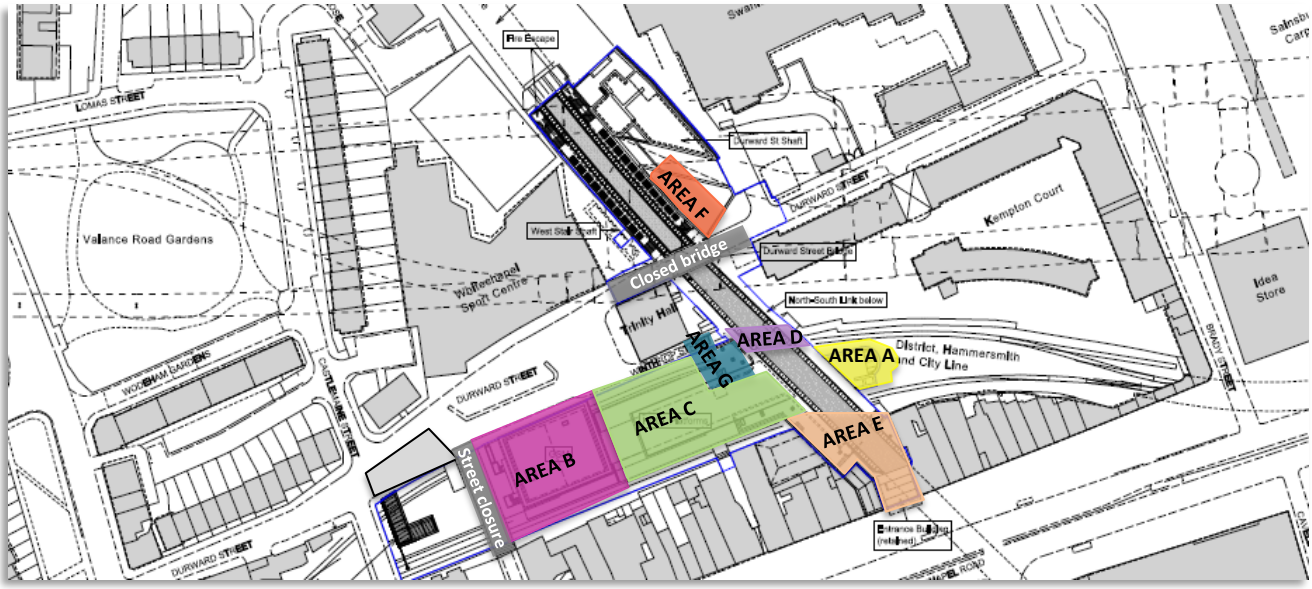
- Ongoing site upgrade activity in the vicinity of Whitechapel station

What we will do

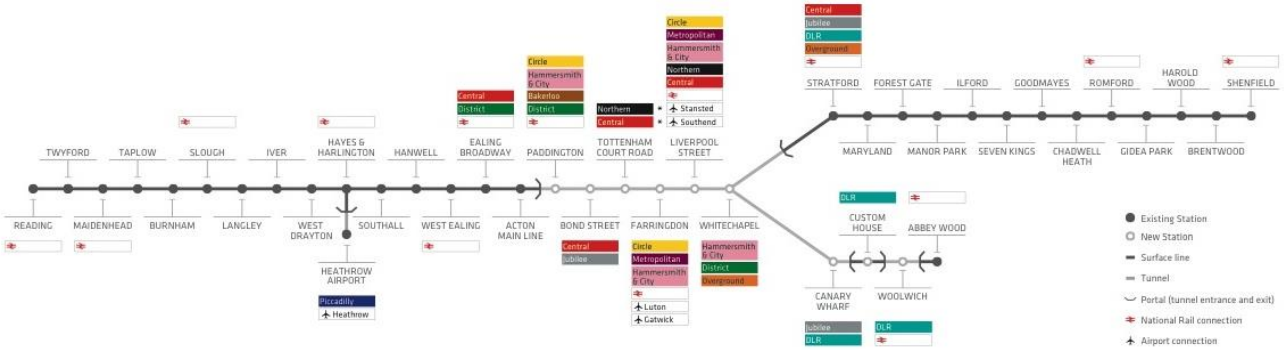
- Monitor noise and dust and work in accordance with our consents as agreed with the London Borough of Tower Hamlets

Continued overleaf…

...continued from overleaf



Area A	Concrete coring activity will take place at night prior to the closure, from the week commencing 31 October 2016. After the closure, external cladding panels will be installed. This will be in addition to our normal programme of work in this area and will continue 24 hours a day Mondays to Sundays after the closure, until the end of the year.
Area B	Installation of scaffolding and steel canopies, fireproofing and track level excavation activity will take place in this location. The programme of scaffolding activity will take place at night from 7 November onwards and will continue for approximately two weeks after the closure. Night time scaffolding deliveries to support these works will take place from early-November onwards.
Area C	We will be installing metal decking, excavating and breaking out sections of the platform in this area. Concrete pours will also take place. Steel canopies will be installed above the platforms.
Area D	Fireproofing of steel canopy and cladding installation will take place above the London Underground line in this area
Area E	The refurbishment of the former station entrance area will continue during the suspension of services. This will involve demolition works, concrete pours, blockwork and the installation of steel canopy.
Area F	Concrete pours and reinforcement will be carried out in this area. Concrete lorries will access site via the eastern end of Durward Street.
Area G	An access scaffold platform will be built here. As this is adjacent to the London Overground track (which will be operational through the closure), we will build sections of the access scaffold at night in the week prior to the closure, while the trains are not running. Elements of the work will continue for approximately two weeks after the closure. The scaffold access platform will be in use until summer 2017.



About Crossrail - Crossrail is Europe's largest infrastructure project, delivering a new railway for London and the South East. When the service opens, the new railway will be known as the Elizabeth line. Trains will travel from Reading and Heathrow in the west to Shenfield and Abbey Wood in the east via new twin tunnels under central London. Linking Heathrow Airport, the West End, the City of London and Canary Wharf it will change the way people travel around London and the South East and add much needed new capacity to London's transport infrastructure.

Whitechapel and Stepney Green Community Liaison Panel

Crossrail runs a community liaison panel for each central London station to keep local community representatives informed of progress and plans. If you would like further information please contact crossrailliaisonpanels@crossrail.co.uk
