

GOOD PRACTICE INFORMATION

Drinking Stations

During the recent hot weather spell, BFK at C435 Farringdon decided to bring in water coolers and position them around site. Due to dust and dirt around site providing a challenge in keeping the water coolers and cups clean the site team decided to use new portaloos cabins as water stations around the site.

The benefits include:

1. Easily identifiable as a water station
2. Helps prevent the water and cups getting contaminated, contains all rubbish (used cups etc.)
3. Keeps the site tidy.
