

◀ GOOD PRACTICE INFORMATION ▶

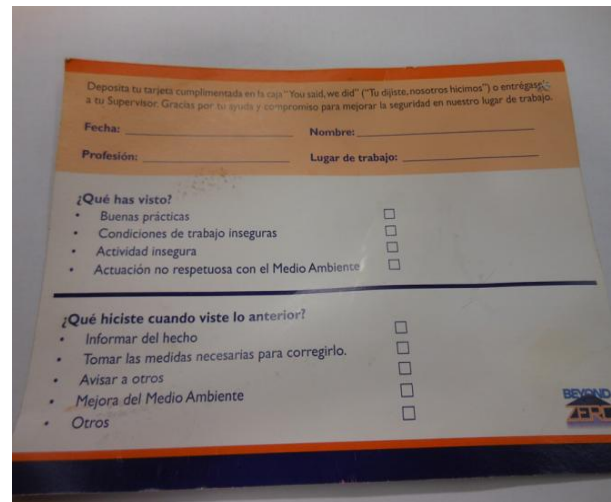

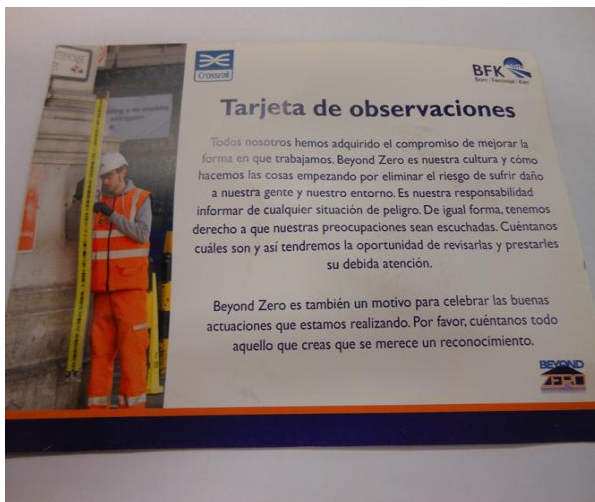

Spanish Observation Cards

This Good Practice should be considered at all Contracts where English has not been identified the first language of certain worker groups.

Observation Cards in Spanish are in use across BFK project sites on C300/410 & C435 in recognition of the large number of workers whose first language is Spanish.

These cards have been introduced to increase the confidence of operatives filling out an observation card, as it is in their first language.

Consideration will be given to producing different language versions of the card where BFK has large contingents using other first languages (e.g. French / Hindu / German / Polish etc.).
